DESCRIPTORS: *Paleomagnology, *Geology, *Geological time, Errors, Stability, Magnetic fields, Earth, Terrain, *Terrestrial magnetism, Rock.

First approximation paleomagnetic measurements agree with the results of the algeoclimate reconstruction. It is impossible to prove a relative movement of continents (mainlands) on the basis of paleomagnetic data for the following reasons; the accuracy of paleomagnetic measurements is very low and allows to determine only errors as great as 2000 km and (Earth Sciences--Geology, TT, v. 7, no. 9) (over)
